HOME

Centroprojekt d.o.o, founded in 1950, established its position as one of the leading engineering design consultants in Serbia and Southeast Europe. During many decades of dedicating work they have developed a multidisciplinary team which enables transfer of knowledge of many generations of experts, accumulated on capital projects, domestically and internationally.

With our headquarter in Belgrade (Serbia) and offices in Podgorica (Montenegro) and Moscow (Russian Federation), Centroprojekt d.o.o has domestic and international practices in Europe, Africa, Asia and Middle East with professional licenses in Serbia, Montenegro and Russian Federation.

Centroprojekt d.o.o engineers have experience of working on projects under variety of different international building standards: RIBA, EUROCOD, BOCA/NBC, UBC/ICC and SNIP/GOST. Company portfolio encompasses variety of different building types from infrastructure to high-rise office buildings, healthcare and educational institutions, and both governmental and commercial projects.

Reputation of Centroprojekt d.o.o for quality services delivered on time, management, sophisticated design, and dedication to client satisfaction has shaped the company and provided as with long term clients, many repeated ones.

ABOUT AS

The string of Centroprojekt d.o.o lays in the highly trained engineers with domestic and international experience. We believe in the power of each individual, working as a team in achieving the best quality product for the client, supporting and promoting them to achieve their professional goals.

All projects are designed in the creative environment with cooperation and coordination of highly qualified engineers and technicians with long experience on variety of different building types, from infrastructure to high-rise office buildings, healthcare and educational institutions, and both governmental and commercial projects.

During over 60 years of operation of the Company we created unprecedented bank of knowledge, experience, attention to the details, which today we use to provide superior service to our clients.

Years and decades of partnership has helped to build unlikely relationships and understanding among employees which is directly influencing quality of our design and brings superior value to the client.
